The Board's proposal for a resolution authorising the Board to issue shares in connection with a company acquisition etc. (agenda item 13)

The Board proposes that the Annual General Meeting adopts a resolution authorising the Board, for a period of time no longer than up until the next Annual General Meeting, on one or more occasions and following or deviating from the shareholders' pre-emptive rights, to make a decision to issue no more than 6,500,000 new shares. The Board shall be entitled to decide that the shares be paid for, apart from in cash, via capital contributed in kind or otherwise on terms specified in chap 2 § 5 second paragraph 1-3 and 5 of the Swedish Companies Act or that the shares shall be subscribed for with offset rights. A new share issue deviating from the shareholders' pre-emptive rights may only be utilised to finance the acquisition of a company or part of a company. In the event of a resolution on a directed cash issue of shares, the subscription price of the new shares shall be set at an amount that is in close relation to the price of the Company's shares on the Stock Exchange at the time the new share issue is carried out.

The reason for the right to deviate from the shareholders' pre-emptive rights is to enable the Company, when an occasion arises to acquire a company or part of a company, to quickly and effectively finance the acquisition either by bringing in capital or via capital contributed in kind. The dilution effect if the authorisation is fully utilised corresponds to approximately nine percent of the share capital and votes.

The resolution is only valid if at least two thirds of both the votes cast and the votes represented at the Annual General Meeting have been given in favour of the proposal.

Furthermore, the Board proposes that the Board of Directors, or its nominee, shall be authorised by the Annual General Meeting to make such minor adjustments to the resolution of the Meeting that may be required for registration at the Swedish Companies Registration Office.

The Company shall strive to offer total remuneration that is reasonable and competitive in the market where the Company is operative. The remuneration terms shall reflect 'payment by performance' and vary with the individual's performance and the Company's results. The total remuneration can comprise a basic annual salary, insurable benefits and other variable remuneration or remuneration from incentive programmes.

Following the 'payment by performance' principle, remuneration from different forms of variable remuneration or incentive programmes can represent an important part of the total remuneration for senior management. Such remuneration can be offered both with short-term performance targets (up to one (1) year) and long-term performance targets (three (3) years or longer). Other variable remuneration may be approved by the Board in

extraordinary circumstances, provided that such extraordinary arrangements are made with a view to recruiting or retaining personnel or achieving certain objectives.

The Board of Directors shall be entitled to deviate from these guidelines if special reasons for doing so exist in any individual case.
